

6 April 2018

Dear Colleagues,

FIRST CALL FOR PAPERS for Fluidization XVI, 26-31 May 2019. Guilin Shangri-La Hotel, Guilin, China. <https://www.aiche.org/conferences/fluidization/2019>

On behalf of the organizing committee, we would like to introduce and invite you to **Fluidization XVI, 26-31 May 2019, Guilin, China**. The previous Fluidization XV conference, hosted by **Engineering Conferences International (ECI)**, was successfully held in Fairmont Le Chateau Montebello Quebec, Canada in May 2016. The discussion of various interesting topics in the Quebec conference had promoted interdisciplinary exchange of ideas amongst professionals.

Jointly organized by **Chinese Particuology Society (CSP)** and **American Institute of Chemical Engineers (AIChE)**, we would like to continue to make a good effort next year in Guilin China to organize another very successful conference under this series of conferences, with a target conference size of 250 delegates from all around the world. This conference will examine research and development both locally and internationally. In **Fluidization XVI**, the topics will include but not limited to:

- Fundamentals of Fluidization
- Modeling and Simulation
- Fluidized Bed Applications
- Fluidization in Nature
- Fluidization Poster Session

The **Fluidization XVI** conference aims to provide a platform for technical and scientific professionals from industries, academia, research, government organizations and students working in diverse fields of fluidization to exchange knowledge as well as to keep abreast of the emerging state-of-the-art technologies. More information about the conference program can also be found at the following conference website <https://www.aiche.org/conferences/fluidization/2019> or alternatively by e-mail enquiry to **Lucy L. Alexander (AIChE)** at lucya@aiche.org.

With best regards,

Chi-Hwa Wang

Professor, Department of Chemical & Biomolecular Engineering
National University of Singapore, 4 Engineering Drive 4, Singapore 117585

Conference Co-Chairs

- Chi-Hwa Wang, *National University of Singapore*
- Wei Ge, *Institute of Process Engineering, CAS*

Technical Co-Chairs

- Yunru Bai, *Chinese Society of Particuology*
- Clive Davies, *Massey University*
- Raymond Lau, *Nanyang Technological University*
- Atsushi Tsutsumi, *The University of Tokyo*
- Junwu Wang, *Institute of Process Engineering, CAS*

International Advisory Board

- Hamid Arastoopour, *Illinois Institute of Technology*
- Umberto Arena, *Second University of Naples*
- Franco Berruti, *University of Western Ontario*
- Tony Bi, *University of British Columbia*
- Kefa Cen, *Zhejiang University*
- Jamal Chaouki, *Polytechnique de Montréal*
- Ray Cocco, *Particulate Solid Research, Inc.*
- Jennifer Curtis, *University of California, Davis*
- Liang-Shih Fan, *The Ohio State University*
- Thierry Gauthier, *IFP Energies Nouvelles*
- John Grace, *University of British Columbia*
- J.A.M. Kuipers, *Eindhoven University Technology*
- Ted Knowlton, *Particulate Solid Research, Inc.*
- Bo Leckner, *Chalmers University of Technology*
- Jinghai Li, *Institute of Process Engineering, CAS*
- Adam Luckos, *SASOL Technology*
- Christoph Müller, *ETH Zurich*
- Wojciech Nowak, *AGH University of Science and Technology*
- Raffaella Ocone, *Heriot-Watt University*
- Christoph Pfeifer, *University of Natural Resources & Life Sciences*
- Georgy A. Ryabov, *All-Russian Thermal Engineering Institute*
- Olivier Simonin, *Institut de Mécanique des Fluides de Toulouse*
- Sankaran Sundaresan, *Princeton University*
- Madhava Syamlal, *National Energy Technology Laboratory*
- Wei Wang, *Institute of Process Engineering, CAS*
- Fei Wei, *Tsinghua University*
- Joachim Werther, *Hamburg University of Technology*
- Karl-Ernst Wirth, *Universität Erlangen-Nürnberg*
- Peter Witt, *CSIRO*
- Aibing Yu, *Monash University*
- Guangxi Yue, *Tsinghua University*
- Jesse Zhu, *University of Western Ontario*

Organized By

**American Institute of Chemical Engineers
(AIChE)**

**Chinese Society of Particuology
(CSP)**
